Nutanix PoV Use Cases

Enterprise Kubernetes Platform — Proof of Value Labs

NUTANIX × **VIRTIGON** × **OVHcloud**

Explore **Nutanix Kubernetes Platform (NKP)** with hands-on, self-service labs. Our PoV environments let you experience enterprise-grade Kubernetes orchestration, multi-cluster management, and cloud-native infrastructure — without the setup complexity.

Available Use Cases

NKP Essentials

Deploy and manage Kubernetes clusters with Nutanix's enterprise platform. Learn cluster lifecycle, workload deployment, and GPU integration.

Includes: Management cluster + 2 workload clusters

GitOps & CI/CD

Implement GitOps workflows with Flux CD integration. Automate deployments, manage configurations, and build production-ready pipelines.

Includes: GitOps tooling + sample applications

Observability Stack

Deploy comprehensive monitoring with Prometheus, Grafana, and centralized logging. Gain visibility across your entire Kubernetes estate.

Includes: Full observability suite pre-configured

How It Works

1
Select
Choose your use case from the portal

2
Deploy
Environment provisioned in minutes

3
Explore
Full access with guided tutorials

4
Evaluate
Test your workloads & scenarios

Why PoV Labs?

Instant Access
Self-service portal, no waiting for setup

Isolated Environments
Dedicated resources, full admin access

Guided Learning
Step-by-step tutorials included

Real Scenarios
Production-ready configurations
